DRONE TECHNOLOGY AND APPLICATIONS

The Drone Technology and Applications Certificate of Completion non-credit program will introduce students to how drones are being applied across a variety of fields, including but not limited to: real estate, journalism, search and rescue, agriculture, disaster response, law enforcement, photography and videography, mapping and surveying, remote sensing, and fire science. This two-course program will provide students with the knowledge to pass the Federal Aviation Administration (FAA) Part 107 license exam, as well as provide training in sUAS operations and data collection.
